

Product Version: NetBeans IDE 7.0 Beta 2 (Build 201102100000)

Test Spec: TS 65 Apisupport Sanity <http://wiki.netbeans.org/TS_65_Apisupport_Sanity>

Test Specifications		Result status: Windows XP 32 bit. Java 1.6.0_23; Java HotSpot(TM) Client VM 19.0-b09.	Result status: Windows Vista 64 bit. Java 1.6.0_23; Java HotSpot(TM) 64-Bit Server VM 19.0-b09.	Bugs Found
1	Modules Suite Wizard			
1.1	Invalid suite name	Pass	Pass	-
1.2	Valid suite name	Pass	Pass	-
2	Module Project Wizard			
2.1	Invalid module name	Pass	Pass	-
2.2	Valid module name	Pass	Pass	-
2.3	Add to module suite	Pass	Pass	-
3	Library Wrapper Module Wizard			
3.1	Invalid library file name	Pass	Pass	-
3.2	Valid library file name	Pass	Pass	-
4	NetBeans Platform Manager			
4.1	Add platform	Pass (Observation 1)	Pass (Observation 1)	-
5	Platforms			
5.1	Select target JDK	Pass	Pass	-
5.2	Harness selection	Pass	Pass	-
6	Action template			
6.1	Create new Action	Pass	Pass	-
7	Meta-Inf services browser	Removed from the IDE in		-

		version 7.0?		
8	Test libraries Node			
8.1	Check	Pass (Observation 2)	Pass	-
8.2	Test Library Customizer	Pass	Pass	-

Observation 1: After clicking Finish, the IDE was unresponsive for several seconds before the new platform appeared on the list. Same for both operating systems, although the machine with Vista was faster and hence the delay much shorter.

Observation 2: Encountered this issue while trying to edit the .xml file in the IDE on Win XP: http://netbeans.org/bugzilla/show_bug.cgi?id=195269 This issue is however not related directly to API support but rather to the editor, and hence I did not list this in the bugs found column. Also, it already existed when I uploaded the report from the IDE. And it did not happen on Windows Vista.
